GARDEN IRISES

The SIMPSON IRIS GARDENS
GLEBE ROAD LIVINGSTONE HEIGHTS
CHERRYDALE VIRGINIA

SHIPPING AND PLANTING TIMES

Shipping and planting in the spring with us is from about March 20 to May 1; then comes a gap to cover the blooming period when no shipments are made. Summer or fall shipments begin about June 20 and continue until freezing weather. Spring planting is perfectly safe, though July, August and September are the best months for doing this.

These planting times specified as after blooming ones, are probably the best for Virginia and all points north of it. South of this latitude, or in points rather far south, we would plant as soon as possible after blooming or else wait for September or October in order to avoid setting-out at about the times when long hot periods of weather can be expected.

VISITORS OF COURSE ARE INVITED DURING THE BLOOMING SEASON.

There are a great many more named varieties in the Gardens, on trial, than are given in this Price List, besides hundreds of seedlings. Some will eventually "make the grade" and be listed while others will not! Come and see which of these are worth while.

How to reach the Simpson Gardens by automobile: As a rule, make for Washington, D. C., and then cross the Potomac over the Key Bridge, at the south end of which you will be in Rosslyn; get on the Lee Highway here and drive west for three miles until the Glebe Road is crossed (at Lee or Livingstone Heights), at which crossing turn north and about 300 yards farther is the site of the gardens. Briefly, the Gardens are three miles from Washington, at Livingstone Heights, corner Glebe Road and Livingstone Avenue, one-half mile west of Cherrydale, Va.

Telephone or Telegraph Orders

Orders from persons known to us will be accepted by telephone or telegraph. The phone is via Washington, D. C., "Clarendon 1832." Telegrams should be addressed, via Washington, to "H. P. Simpson, phone Clarendon 1832, Cherrydale, Va."

The Varieties

Prices are for strong single rhizomes; in the case of the standard or older varieties, in each half-dozen or dozen ordered you will probably find some double rhizomes, though we cannot guarantee to make it a rule to do this. The effort is made to give as much as possible for the prices asked and satisfaction is guaranteed to all reasonable purchasers. No thumb-nail sizes are sent out.

Prices have been sharply reduced on many of the standard or well-known varieties, when three or more of the same kind are ordered.

The heights are given in inches and are those of normal bloom stalks as found in the average garden.

Do not forget that nearly all yellow varieties and those having a strong yellow strain in them will grow rather small roots—it's Nature's rule and we can't help it. In such cases we try to make it up by sending extra-bud roots, or more roots than are ordered. This is our way of trying to avoid any kind of disappointment to a patron.

MISCELLANEOUS IRISES

Siberica:

Snow Queen, small clumps	each	40c
Blue King, small clumps	"	40c
Grey Prince (a beautiful blue and grey Simpson seedling), small clumps	"	$1.00
Perry's Blue, small clumps	"	50c
True Blue, small clumps	"	40c
Spuria, Lord Wolseley	"	50c
Pseudoacorus	"	25c
Tectorum, blue	"	35c
Tectorum, alba (white); rare and scarce	"	$1.25

These miscellaneous Iris are not recommended for summer planting. Fall or very early spring is the best time for moving them.

In case you have set apart a certain sum for Irises, our advice is to purchase fewer varieties, and more of each variety. You will yourself be better pleased in the long run by doing this. Of course expensive kinds may have to be secured one by one, instead of three or more of a kind.

Interesting Books for the Iris Gardener
